Figure 1 – Head profiles at well and midpoint over entire simulation duration.

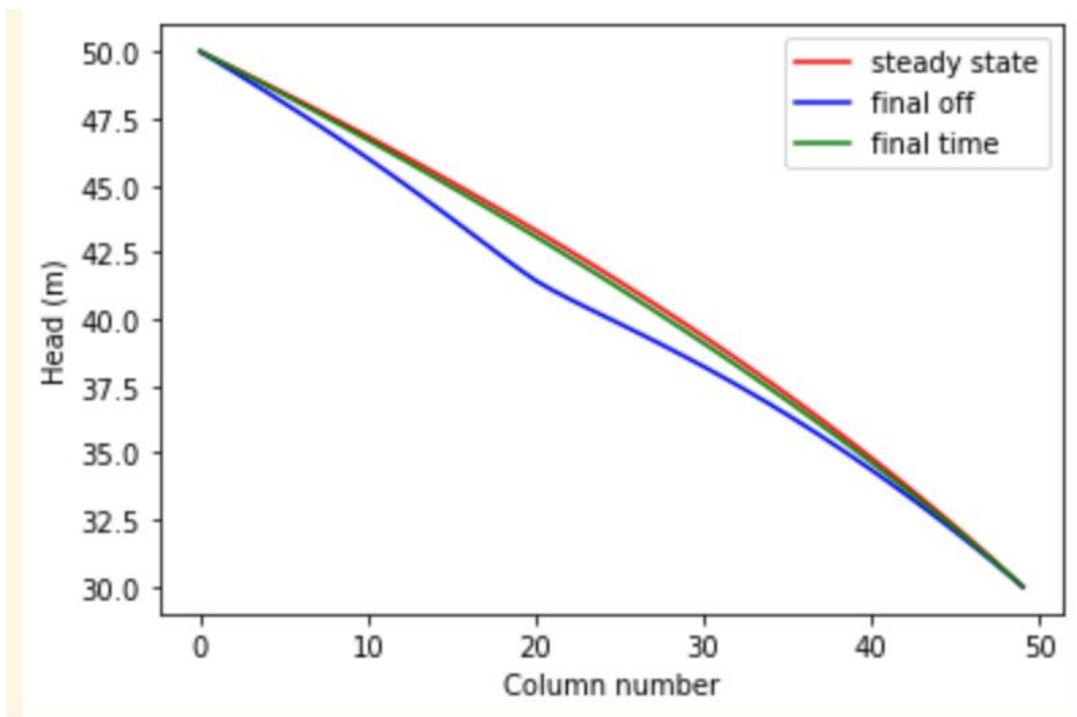

Figure 2 – Head profiles for init. Steady stat conditions, the final off time, and final time of sim.
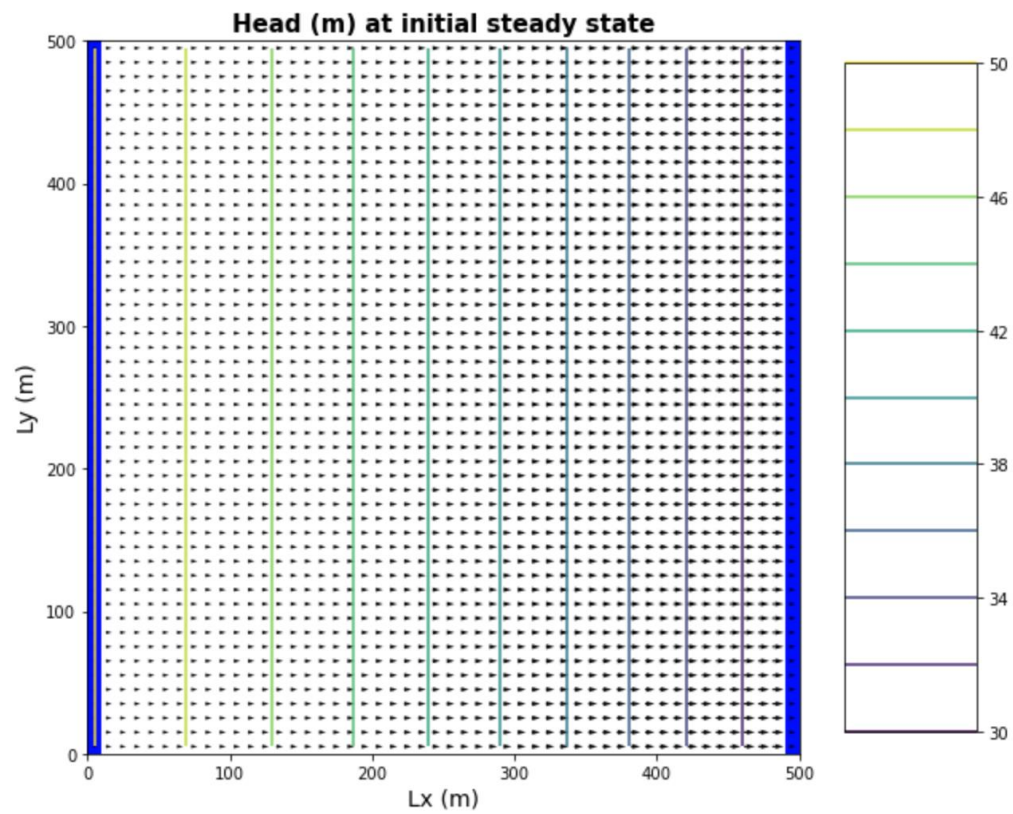

Figure 3 – initial steady state conditions prior to pumping. Time 0

Figure 4 – head profile at last pump on period, time 112

Figure 5 – head profile and flow for final pump off – time 120

Figure 6 – drawdown from start of simulation to final pump on

Figure 7 – drawdown for final pump off to end of simulation time
